1990
Index to Volume 52

This index includes everything published in the American Biology Teacher during 1990 (Volume 52) except filler material. Book reviews in the Title Index are listed with the names of the authors of the books in parentheses, not of the reviewers, who are listed in the Author Index. Initial articles (a, an, the) are not considered in alphabetization in the index. The index is alphabetical word-by-word. For example: "educational" would follow "education theory." Page numbers indicate the first page of the article or department in which the entries appear.

Entries are in three categories: Subject, Title and Author. All entries include one of the following key codes:

A = Article	AV = AV Review	R = Book Review
F = Feature	E = Editorial	L = Letter

A typical entry might be: Zoos 5:555A
This would mean there is information on Zoos in issue 5 (May), on page 555, in an Article.
